Your NonStop Solution Source

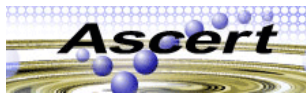

NonStop Productivity Toolbox

Webpage

The **NonStop Productivity Toolbox** (NPT) from Randall Consulting, is the most comprehensive, convenient and usable collection of tools available for the NonStop platform. There is no PC software to install, or reliance on a non-fault tolerant operating system. These tools are 100% NonStop and are designed as an integrated network of pluggable modules.

- Be more productive, more efficient and more accurate.
- Automate maintenance tasks.
- Be proactive… find issues before they are errors.
- Track, log and report maintenance and growth.
- Identify rogue processes and performance bottlenecks.
- Save time, get more done with less effort.
- Manage your NonStop server more effectively.

VersaTest

Webpage

The **VersaTest** testing platform provides a powerful, intelligent message processing facility that extends your testing boundaries by providing a single testing environment that spans multiple server platforms. VersaTest can reside on many different types of servers so you have the flexibility to choose the appropriate test driver platform to best meet your needs. On each server platform, whether it be the HP NonStop Server, IBM Z-Series or other supported server and operating system, the product assists in many facets of monitoring, testing, development, quality assurance and capacity planning.

VersaTest comes packaged with four different solutions (VersaTest OEM, VersaTest Simulator, VersaTest Classic, and VersaTest Automator) designed to meet any company's testing needs or budget.

System Connections has established a reputation of excellence by providing our customers with quality service at significant savings. We offer customized maintenance plans tailored to your organization's specific needs. Our goal is to provide our customers with quick response times, reliable service, and proven hardware at a competitive price.

System Connections, Inc. offers a wide range of maintenance support plans that can be customized to the individual needs of our customers. Contract support options range from "Time and Materials", to contracts that align with businesses normal "hours of operation" to 24 x 7 coverage.

By using PANfinder to scan each of your systems for unprotected PAN data, you can ensure there are no live PANs residing in unknown locations and therefore no valuable card data available for hackers to steal. PANfinder also provides you with a way of proving that all PANs on your system are being stored in accordance with the Payment Card Industry Data Security Standard (PCI-DSS).

PANfinder Key Features

- PAN discovery & PCI-DSS scoping tool
- Extremely accurate - Intelligent false-positive reduction
- Several FASTscan™ options
- SIEM integration via Syslog
- Agent mode option
- Minimal CPU performance impact
- Configurable search criteria
- Automated searches and reports
- Scanning of open and locked files
- Helps meet PCI-DSS 3.2, 3.4 and 6.4.3
- Clear, PCI compliant reports produced

About Us

Gary Stanton, founder and president of **Stanton Systems Inc,** has over twenty years of experience in the NonStop arena.   After twenty-two years with ACI Worldwide in a variety of roles from Systems Engineer to Sales Executive, and two years with HP's NonStop Enterprise Division,   Gary founded Stanton Systems LLC.

Our primary and only charter is to provide customers with the best-of-breed NonStop solutions at the most competitive prices.   You can reach us anytime at 913-558-5353 or contact Gary directly at gary@stantonsys.com
